

National Brownfields Coalition Partners  
shape and achieve progressive

## BROWNFIELDS POLICY

Whether a private company, public agency, non-profit organization or academic institution, members of the National Brownfields Coalition shape the federal policies that help clean up and reuse blighted, underutilized or contaminated land equitably and cost-effectively.

### Become a Member of the National Brownfields Coalition now and build the nation's brownfield strategy

The National Brownfields Coalition (NBC) Membership Program is a powerful way for the public, private and non-profit sectors to advance national policy, like the BUILD Act, which guides millions of dollars toward federal brownfields projects. Members also shape how the nation understands the issue of brownfields and advance new solutions that clean up and redevelop contaminated or blighted land.

#### Convene

We bring together leading experts to develop and shape federal brownfield policy.

#### Educate

We collaborate with emerging and experienced professionals to identify hot issues and cultivate leadership.

#### Advocate

We advocate for federal authorization and appropriations policies that support cleanup and redevelopment.

- Members at any level are eligible to serve on a committee at the discretion of the committee chair.
- Those representing a non-profit or government entity may inquire about a reduced or waived membership fee.
